# **3 Ways to Instantly Boosting Affiliate Commissions - Affiliate Marketing Basics**

At the Internet provides ideal conditions for making money quickly, this perk must be used by a successful affiliate marketer.

Here are powerful and effective tips to boost your affiliate program commissions very quickly.

### **1. Find the best program and products to promote.**

There are several factors to consider in choosing such a program. The program must have a generous commission structure. The products must fit in with your target audience or your list. The program must have an easy to navigate solution that helps to track your affiliate work and withdraw money.

### **2. Gather email addresses via niche info products.**

People are not likely to make a purchase on the first solicitation. That is why it is much better to grab their attention with some free info product that is very close to the topic of product or service you want to sell. This will prepare the audience to make a purchase and will give you an excuse to send them more emails (for example, in the form of newsletter or regular tips) and "squeeze" them for a purchase.

### **3. Negotiate higher commission from merchants.**

You can split your promo list on 2 parts and do a promo of a product or service on a smaller part, make some sales and then come back to the owner of the product/service and say something like, "Hey, you see, I made you some bucks. This is a small part of what I can deliver. How about increase my commissions and I will send the promo to the rest of my base"

As you can see, nothing impossible was mentioned in the 3 tips. But when you use them, "for some reason" the profits from affiliate marketing jump up very quickly.
