# **Draw On ClickBank And Enjoy More Profits Than Adsense**

As you know various streams of income an essential part of Internet Marketing. If it were not for auto pilot profits we would not make half as much from the Internet as we do today.br /

br /

a href=<http://www.niche-websites-boosted.com/info/cbadrotator.htm> target=\_blankAdsense/a Systems that produce affiliate income and paid promotion commissions contribute to a large percentage of our monthly income. One of these sources of advertising commissions is Google's AdSense program. BTW, this post is not about Google's AdSense program! Far from it in fact, this post is about the fact that we are all losing a large amount of revenue because of AdSense.br /

br /

Every day, I find these big problems to my business and most importantly my business earnings which I use to support my family. So ask me "Do you have the right to complain?" Yes I do! Just because Google are the major search engine provider in the world, does not mean they have the best a

href=<http://www.niche-websites-boosted.com/info/cbadrotator.htm> target=\_blankcommission/a advertising and commission structure for paid ads does it.br /

br /

When was the last time you generated over \$1 for a 1 click from your paid ads? When was the last time you looked at your website ads and found Googles AdSense target ads displaying something completely irrelevant to your website content?br /

br /

When I first started out to become an Internet Marketer, I got stuck right into Googles AdSense program and I did ok, but over the years my AdSense earnings have slowly dwindled and I hardly find it worth it anymore. Now don't get me wrong here, there are marketers who make great profits from AdSense I have seen it personally, there have been times when I have checked my account and made over \$20 in one day from AdSense so the bottom line is the AdSense program does work and does produce you money.br /

br /

Although, I do think it could be healthier. Now CB Ad Rotator does the same job as AdSense with some superb improvements:br /

br /

1, You have no threshold of \$100 to reach before commission payment, this means the new guys get paid after one click led sale.br /

br /

2, Your commissions are a lot higher, than AdSense meaning you get paid a lot more for sales i.e. ClickBank products worth anywhere up \$297.00 with up to 75% commissions on some products. This as you know is the highest payments possible, but if you take the average product at say \$47 with the average commission 55%, this is still \$25.85 commission from one click.br /

br /

3, You can nominate your exact targeted ads with your own key words, this is not run by scanning content and producing as which sometimes are not relevant. All ads are relevant to your website.br /

br /

4, Easy to setup guides in the form of email and video tutorials.br /

br /

5, You can even run the two ad programs side by side. Why have one preset income when you can have two  
These are just some of the excellent feature you can utilize to push your business further....br /

br /

'DID YOU WANT PROOF'br /

Take a look at <http://www.niche-websites-boosted.com/info/cbadrotator.htm> for a comparison table and real screen shots of a weeks earning from both paid ad systems. You will then see the truth.br /

br /

Remember CB Ad Rotator is not a replacement for AdSense, the two can run side by side. If you are looking for an extra form of income on complete auto pilot from your visitors, then this is paramount to your website success. If your AdSense empire come crashing down from a banned account then this is your salvation too.br /

br /

The potential of commission based ads is here ! Seriously, from one online marketer to another, this is a no brainer and another auto pilot commissions stream worth using.
