Earn Extra Income Online: Data Entry Job Available

From The Home Office Of: Data Entry Job Networkbr /

Date: January 13, 2009 br /

br /

Hello,br /

My name is Timothy Darwin, and I am the Director of My-Data-Team. I would personally like to invite you to become part of our team doing work-at-home data entry. We have guided thousands of team members to success using our new type of data-entry job called Global Data Entry. Some members are currently making \$300 - \$2000 and more per day, using our program and guidance. We have been dealing with online data entry for over 5 years. Do you have a few minutes? I will explain more.br /

br /

The Legitimacy of Our Company br /

br /

First, I would like to make something very clear. We are NOT a get-rich-quick company. If you are visiting our Web site looking for this type of opportunity, I am sorry to inform you that the programs we offer are not get-rich-quick schemes. We are a legitimate company, offering legitimate work-at-home job opportunities that have proven success and that we stand behind 100% with our satisfaction guarantee.br /

br /

I completely understand all the hyped programs that end up scamming their members. I understand the ratio of scams to legitimate programs is 30:1 and we would expect skepticism because of this. I would like the opportunity to show you who we are, and that we follow a code of business ethics. br /

br /

I want all of our members to be part of something special through the ups and downs, the good and the bad. It is all about being part of a company and team doing legitimate business. However, I must add we like to focus on the Ups and the Goods of doing this job.br /

br /

If you read through this opportunity and feel this is just another get-rich-quick scheme, we will completely understand. We hope you will give us a few minutes, so we can try to make you feel more confident in our company and the program we are offering to our team members.br /

br /

We have been offering work-from-home data-entry jobs which include: br /

br /

- Traditional Data-Entry Jobs br /
- Word Processing br /
- General Transcription br /
- Business Coding br /
- Legal Transcription br /
- Document Data Recording br /
- Input Data Capturing br /
- Data Research br /

And many more work-from-home data-entry jobs. Now we have added a work-from-home data-entry job called Global Data-Entry which is designed for people with NO PRIOR EXPERIENCE in any of the data-entry fields listed above.br /

br /

br /

Every day more companies are downsizing, moving overseas and outsourcing many of their positions. Because of this, a brand new opportunity has come about: A work-at-home job called Global Data Entry. There are many large companies from all over the world that turn to companies like us to provide them with workers, and to fill many openings in this brand new field. This is considered a more non-traditional data-entry job, unlike anything you have ever seen. br /

br /

We will also provide you with traditional data-entry jobs and assignments, if you are interested in that field of work. We have designed a program that allows our team members to take advantage of this fast-growing market. You may have come across just a few sites that are offering this type of data entry program, as most of the data-entry sites you will see online are just costly ad typing scams that give companies like ours a bad name.br /

br /

In five years you will see companies like ours popping up like Starbucks at every corner. We are one of the pioneers of this program, and now is the time to become a member of our team, before it is too late. This is not going to be a fad. This is the look of the new generation of work-from-home jobs. br /

br /

Our program has been designed to run on autopilot; all you need to do is just spend 30-40 minutes per day. It is possible to make \$300 - \$2000+ per day working from the comfort of your own home, as you will see from pay report link we list from our members on this page. This is a Real Job, a Real Opportunity. We will also Guarantee our program to our team members, and offer complete support through the process.br /

br /

How Our Program Worksbr /

br /

We require NO past or special data-entry experience to use our Global Data Entry program. We have designed this data entry job to be so simple that anyone with a computer, keyboard and an Internet connection can participate in this program. An extra 30-40 minutes a day is all that will be required for you to participate to perform these data entry jobs, and to possibly earn an income you could have only dreamed of, all in the comfort of your own home. br /

br /

Once you have signed up with our team, we will provide you with complete guidance and tutorials on exactly how to do these different job tasks and to make this work for you. You will have instant access to over 17,000 companies (and growing) that have looked to our team members to provide assistance in typing and posting data. We will guide you in the process of enrolling with all of the companies. br /

br /

We assure you that you will be accepted to all of these companies and never be denied or charged additional money by these companies. br /

br /

We are not charging for a list of companies or the jobs themselves. We believe as you do: that if any work-from-home job is legitimate, you should never have to pay money to companies or jobs that should be paying you. All of the companies and jobs we provide are 100% Free. br /

br /

We used to give all our workers the free training, software and resources needed to do this job for free. However, what happened is many people were just curiosity seekers and did not follow through on their end to do the work we needed. We could not justify the cost of giving away the free software and training program anymore.br /

br /

So now we only charge a small fee for the registration processing and login admin. We give you the training tutorials, research, support, tools, software, and the jobs for free. An example of the value of the membership and tools you receive, is that the price of the software we provide is worth triple the price of the one-time membership fee we now charge. So, if you were to purchase the software separately, you would pay well over \$300. br /

br /

We provide all of the software, training, tutorials, research, companies, jobs and resources that is needed for all of our team members.br /

br /

You will be considered an independent contractor; therefore, your taxes will not be deducted from your paycheck; this will be your responsibility. We will even assist you in how to take all the benefits from working from home doing these data-entry jobs, and get you set up for this process. br /

br /

You will never be asked to do anything illegal or against your ethics and beliefs. Once we get you signed up, you can start working immediately, and start earning an income that will keep on growing, dependent upon how much time and effort you would like to contribute.
