# Marketing Online - Easy Job?

## [Google Hijack](#) And Internet Marketing - A Real Job

I am going to talk here about internet marketing and how this is a very important matter for those that are going to start a business in this domain. Most of all I will try to explain to you why you should take this job seriously and not consider it a joke.

Most of the people don't see the internet as a working environment only as a playground and this is their first mistake. Not everything that has to do with internet is for playing or only for research purposes. Nowadays the internet is a viable working space and quite a profitable one for that matter. There are a lot of possibilities of making money online but I am going to tell you about a specific one : internet marketing. This as some of you may already now is based on the simple concept of marketing. You as an affiliate have to sell a certain product for a certain producer and by doing this you will receive a sum of money. How this thing works is: you will have to write articles or do all sorts of campaigns to promote that certain product and from this campaigns you will send the customer to the producers web page where he will ultimately buy the product. This being what you will be paid to do.

Now that you know how internet marketing works it's time to tell you more about the way you should approach this type of work. I said earlier that most of the people don't think that the internet is a veritable working space, most of them don't see it to be one at all. Here is where they are wrong and where you shouldn't be because if you make the mistake of thinking of the internet as a playground or take it as a joke you will most definitely not succeed in this job. In this job you will be your own boss, yeah I know that is great , but don't get your hopes up because of this you will have to plan all your work and most of all make sure that it will be done on time because if it's not you will have to pay for it. I know it sound strange "paying for it" but most of the time this is the case because in business time really is money and for every second you waste loosing time you will loose money too. You will only have to work hard in the beginning but after you get the hang of it and you know how it's done it will be a piece of cake. So I will tell you only once take this job seriously or else you won't be able do succeed at it and to benefit from all the great rewards it can bring you.

I hope you will choose this line of work because it truly is a nice one and you are going to like it when the pay day comes believe me. This is a real job so please be serious about it.

I am Jonathan Marshall and I studied internet marketing at a very good online University which is called Wealthy Affiliate University and I am very pleased with the outcome. It took me a while to get here but now that I am I can sincerely say that Wealthy Affiliate University has helped me a lot and has made me into a successful internet marketer. So if you want to know more about Wealthy Affiliate please visit my web page: <http://www.squidoo.com/reviewofewa>  
Good luck!
