# **MyArticleNetwork.com - 4 Vital Steps To Get Backlinks**

[MyArticleNetwork.com](http://MyArticleNetwork.com) is a radical backlink building as well as site content innovation system. It surely makes a few bold claims that I required to study previous to investing too much of my time into it. I was scalded by a similar mass article submission procedure 6 months ago - plus the sites I used have still not improved from the Google slap. In my experimentations I revealed how to grow the top consequences and this is what I am going away to disclose to you in this piece of writing.

What Is MyArticleNetwork.com?

Myarticlenetwork is an automatic article submission procedure built on a massive network of over 10,000 quality blogs. I suppose you may perhaps label it article 2.0 distribution. You build an article, which you go in into the system and is then routinely distributed in a Google Friendly approach to associated blogs. The end result is your site collects a controlled total of backlinks from relevant sites over time which increases its status in the search engines. The turn over side of this is that you can also submit your blog to take delivery of these piece of writings - this is in addition a huge idea but not the terrific feature for me.

Important Step 1 - Related Category

Starting my experiments choosing a relevant specific category is crucial. It's no disclosure that Google will grant more weight to a backlink from a related site - so it makes sense to pick the most special category available. Don't worry my article network as a great list of almost 100 unlike categories to choose from.

Important Step 2 - Spin Your Articles

The most inspiring feature of my article network is the facility to turn or re-write your piece of writings. This is totally vital to obtain highest effect from article distribution. If Google sees the article as been only one of its kind (even slightly) it will provide more heaviness to the backlink. There is a manual and automatic rewrite feature which is really powerful. From my examinations I propose rewriting the article 1000% - this means giving 10 rotate titles. Further to this I strongly give an opinion you rewrite the body 200% - this equates to 2 rotate sentences for all sentence. This will take approximately 20 minutes for a 500 word article. Believe me when I notify you its the greatest 20 minutes you can invest in your article. Finally of the day the more re-writing you complete on your piece of writing the better

Vital Step 3 - Limit Your Distribution Level

Any more great feature of my article network is the ability to control the submission level of your article. You can in reality position a maximum control on the quantity of times your articles will be submitted. From my test and experience you don't want to distribute more than 30 - 40 copies of the 1 article if you follow the above tips concerning spinning your article. Additional to this you can progressively grow your distribution level over time so you can persistently drip feed your articles also assurance they stay as Google Friendly as potential.

Significant Step 4 - Don't Include More Than 2 Backlinks

At present the makers of myarticlenetwork tell that you can take in up to 3 backlinks in the 1 article. I disagree with this again from experience. The total idea of the article is to have anchor text links back to your blog completed from first to last related keywords. It has been publicized Google will infrequently give weight to any more than 1 - from time to time 2 links from the 1 article. Any longer than this can sometimes be comprehend as spam, and you don't end up getting the force from the backlink as you normally would. More to this I give an opinion that you decide to include 2 anchor text links, ensure they are via unlike keyword phrases - even if its just a plural version - confirm they are dissimilar.
