# **Secrets of Finding Hot Selling Products for Affiliate to Sell**

The basic principle is pretty simple - you need to **understand what people already want to buy**. "Want to buy" is a must, because you have no time to persuade them. Being wise about your time and efforts is one of the keys of successful affiliate marketing.

You just need to satisfy the need, wants and expectations of potential customers for a certain product. Needs are the basic reasons or the minimum requirements that are being looked for by consumers in a certain product or service. Wants are the determining dimensions among many choices that are available. And expectations are the values (intangibles) associated with this product or service.

Another important thing to be considered is the level of competition. Surely it is much better to choose the market segment where we can have a potential leadership with least efforts involved. This approach provides the fastest shortcut to the monetization of affiliate business.

And one more critical factor to choosing the hot selling affiliate product is to measure out the general interest level about the product. When doing this kind of research you will not only see how eager people are about this or that product. You can also see how others are advertising this product.

Having taken all these things into consideration and done the home work you have all info that is necessary to see whether your affiliating efforts are going to be a success or not and how quickly you can make money on it.

**If these negative factors do not overwhelm the niche:**

- *not enough demand*
- *too much competition*

...then your chances for affiliate success are pretty high. Congratulations, you have found a good candidate for a hot selling affiliate product.
