# The Newbie Blueprint - Could It Help You?

Congratulations if you are successful at article marketing... The Newbie Blueprint is not for you, because its about article marketing (also called bum marketing because its free and even a bum... a homeless person with NO MONEY... can do it).br /

br /

If you are an experienced internet marketer... again, TheNewbieBlueprint is probably not for you. Well, unless youve been making your internet income from, say, pay per click marketing -- then it might be something you really could benefit from.br /

br /

HOWEVER if you are OVERWHELMED by a ton of information coming at you from all over the place, then this simple manual will help cut right through all the noise and get you back to basics.br /

br /

The basics that WORK. Hundreds of people (or is it thousands?) use the system that Daniel outlines here. And they use it successfully.br /

br /

br /

YOUR INFORMATION OVERLOAD PROBLEM IS HEREBY SOLVEDbr /

br /

I recall reading one review of The Newbie Blueprint recently and he also expressed the thought that there wasnt much new stuff in it but the true value of this short report is that it forced him to re-evaluate what he has been doing online - and why a newcomer can have such impressive success so soon. br /

br /

I mean... to be earning \$3000 in his second month is mighty impressive!br /

br /

Daniel achieved it because he FOLLOWED a simple plan. br /

br /

Just 5 steps.br /

br /

Five integrated, connected, logical steps.br /

br /

No rocket science here - just a sensible system to make money writing articles.br /

br /

But the thing is... he STUCK to the system. He DID the work. And now he reaps the rewards.br /

br /

The articles he wrote in his first month are still producing residual income.br /

br /

In his second month, he added a whole new months worth of residual-income-producing articles.br /

br /

Each month he is increasing the number of passive income generators hes got (that is what published articles are -- passive revenue stream!). They are working day and night for him, triggering affiliate sales... and he gets paid a decent commission every time.br /

br /

br /

SIX FIGURE INCOME FROM ARTICLES?br /

br /

His website talks about a 6 figure income from writing ezine articles. Heres how I figure that. br /

br /

If one months focussed work generated \$3000, thats  $12 \times \$3000 = \$36,000$  for the year.br /

br /

In the second month of doing the same, he will add another \$3000 of passive income streams. Thats  $11 \times \$3000 = \$33,000$  by years end... on top of the income streams he set up in month #1.br /

br /

In his third month, he can add another \$3000 worth of income streams, which will add  $10 \times \$3000 = \$30,000$  by years end.br /

br /

Add that up and were already at \$99,000 for the year. Yep, even if half of the articles earn stop working so

magically after a few months, the 6 figure claim could turn out to be true if he keeps this up.br /  
br /

I think if I was him, Id soon be hiring ghostwriters. Hmm, now youre talking! - more articles, less work, more income. Sounds like a plan to me.br /

br /  
Will you earn a 6 figure income from articles? I have no idea. But if a 20 year old can do it why not give it a go? With the refund guarantee on his book, if you dont get the results you want get your money back. Win/win.br /
