The Way To Double Your Online Business With Phone Services

Go4Numbers.com are an international [phone numbers](#) service provider that supplies VoIP phone numbers and toll free numbers in over 70 countries, 4500 cities. And we provide fresh new technology telecom service binding with each of number, coming with different service bundles, like call forwarding hosting, fax hosting, conference and callback hosting. Small or middle businesses using our service can establish a presence in any given locale of the world, without a real office or brunch. Save you a lot of money on your brunch offices establishment. No matter you are looking for international business growth, or you are seeking more effective connections with your brunches, partners or customers, or even you want to create your own customer support center and conference center, our service will help.

We are expert in personal and enterprise VoIP / telecommunication markets. Our products are proved to meet all level of requirements from individual customers and enterprise customers.

1). Our products

We have the following service bundles available for our customer, and all are global based and come with cheap international call rates:

a). Personal Numbers

-One phone number from any available country or area

-Call forwarding.

You can redirect this number to any other phone numbers.

For instance, you live in United States, and you purchase a British number and redirect it to your home phone or mobile phone number. When your friends or families in UK call that British number, you will be reached.

-Maximal 5 redirections.

For example, you have set up your home phone and mobile phone to be redirected. When your home phone is not answered, our system will ring your mobile phone instead.

-Voicemail.

Your voicemail will take the call when you are not available.

-2 Channels for each number.

If two calls come in at the same time, you are able to answer them with your home phone and mobile phone concurrently.

b). Enterprise Numbers

Enterprise numbers have the all the functionalities which personal numbers have. But they are specially customized for enterprise customers

-One phone number you can get from any available country

-Call forwarding.

You can redirect this number to any other phone numbers.

-Maximal 10 redirections.

For instance, you get a number for your sales team, and you can set up to 10 sales representatives to answer the calls from your customers. Small call center can be built in this way as well.

-Day night shift.

You can redirect the number to different customer support team based on the time table. For example, if you have two customer support teams for day and night shift respectively, the system will be smart to call different team in different time.

-Caller based shift.

Different support teams also can be reached based on where the call from (the prefix), so they can provide better services by customer local language support.

-Customized voicemail.

Customized voicemail greetings can be uploaded. It can be used for multi-languages support.

-2 channels / 20 channels.

We have two products. 2 channels number allows 2 concurrent calls and 20 channels number supports maximal 20 incoming concurrent calls.

c). Fax Numbers

Fax numbers are terminated to receive faxes. It works like a fax machine but you receive fax in electronic copy.

You will deeply agree with our idea if you have received tons of hard copy spam or useless information from your fax machine and have no idea where to dump them. And now you have options to own an oversea fax number.

-One phone number you can get from any available area.

-Fax to email.

You will receive fax from your email box. The fax will be sent in PDF format, which is one of the most popular electronic document formats. You can read and print it when necessary.

-2 channels.

That means you are able to receive 2 faxes at the same time.

d). Conference Numbers

There are so many reasons for your company to have a teleconference system. But most of the solutions will cost you a fortune. Our solution is cheap and convenient to use.

-One or more numbers you can purchase from any countries.

For instance, you have brunches or business partners in both UK and Australia. You can get a number from UK and Australia respectively. Our conference server will work once calls come in. And you can set up conference and authentication (password verification) by yourself. One conference is able to run on multiple numbers, and you can run multiple conferences at one time on a single number too.

-2 channels / 20 channels.

2 channels number allows 2 concurrent calls and 20 channels number supports maximal 20 concurrent calls.

e). Outbound (Callback) Numbers

If you are working on a promotion campaign or you need to send out important customer notice, normally you have to ring your customers one by one. Hiring people to do this can be big cost. Callback number will free you from the trouble. The system will make an outbound call to your customer and play an audio piece. And if your customers call that number back, you can be reached.

-One or many numbers from any countries.

-Customized audio playing.

You can upload your own audio file or set up 'text to speech'.

-2 channels.

2 channels number allows 2 concurrent calls.

f). Tollfree Numbers

International tollfree numbers are available. You can get USA tollfree or UK tollfree numbers in cheap price. And

tollfree numbers have all the functionalities which are available to the enterprise numbers.

- One phone number you can get from any available country
- Call forwarding.

You can redirect this number to any other phone numbers.

- Maximal 10 redirections.

For instance, you get a number for your sales team, and you can set up to 10 sales representatives to answer the calls from your customers. Small call center can be built in this way as well.

- Day night shift.

You can redirect the number to different customer support team based on the time table. For example, if you have two customer support teams for day and night shift respectively, the system will be smart to call different team in different time.

- Caller based shift.

Different support teams also can be reached based on where the call from (the prefix), so they can provide better services by customer local language support.

- Customized voicemail.

Customized voicemail greetings can be uploaded. It can be used for multi-languages support.

- 2 channels / 20 channels.

We have two products. 2 channels number allows 2 concurrent calls and 20 channels number supports maximal 20 incoming concurrent calls.
