# Where To Start A New Online Marketing Today

a href=http://www.waroengbetawi.com target=\_blankNew internet business/a. The first thing I must say is its a mine field out there, and you must take time to look at what it is you are going to do in your business.br /

If an affiliate program is your choice then make sure that it pays down 2 levels and is well established, and pays you a good commission for your work!br /

There are a number of things to take into account at this point, what amount of time do you have to dedicate to your new online business! Why do I ask this question, because its all too easy to jump at several opportunities when you only have the time to do justice to one.br /

Remember if you are serious about making a living online pick one opportunity and run with it, use the resources and tools listed to help you max out the best from any opportunity you join, and then when you start to get results, and you will, apply the same system for as many business opportunities or products as you like!br /

So where do we start, well you need to choose for example an affiliate program then we need to take it to market. Now this is where things get interesting. How do we do this! There are some things that you must have if you are going to have any success online!br /

These are the tools to your trade/business!br /

1. A sequential autoresponder, now I dont care where you get one but this is a must have for your business. So get one and work with it until your 100% happy using it. You will need this kit to build your opt in list! (Your subscriber base to your ezine)br /

You pre load the AR with messages or articles, set the delivery times say once a week and everybody on your list gets that message its that simple!br /

If you build an opt in list of about say 3000 people then you are in a position to create an income on demand when you like! Once a month send out an email to your subscribers with your latest product or opportunity, Expect a response of about 2% to 5%. Now if we take this at 2% thats 60 and lets say you make \$20 per sale thats \$1.200.00 or 60 people in your new business. If it was 5% well Ill let you do the maths but I think you get the point!br /

Do not underestimate the power of an autorespondar once set up correctly its the single most powerful tool to build your online business.br /

2. Web site, now this is a controversial subject because you dont need a web site to build an opt in list, but you will need to have one soon to promote your product or opportunity, get a quality web host account with 500 megs of disk space and 10 gigs of monthly transfer rate.br /

If you dont have the skill to build your own web site, dont worry there are a number of software packages out there that do all the work, you just need to do a bit of typing and click the mouse a few times and thats it!br /

3. Advertising, now whether its free or you have handed over your hard earned cash for it you must be able to track its performance.br /

Just imagine you have 20 ads on the net all different how will you know what ads are working! Quite simply put, if you dont have an ad tracker you may just as well stand on the top of a tall building and throw your money off!br /

One more thing you might not know, and a question that I am asked more than any other how can I build an opt in list quicklybr /

You need leads and plenty of them and heres the deal you buy them its quick and easy!br /

By using a co-reg paid for service you can put your list building on autopilot, you will pay on average about

\$150.00 for 500 subscribers that will be added automatically to your autoresponder!br /

br /

Just before I go there is one more thing, I recommend using a web based autoresponder so no matter what happens to your PC you will not lose your data, that data is critical to you its your cash generator and you can access it from any PC!br /

br /

An a href=http://www.waroengbetawi.com/perkembangan-internet-marketing-indonesia/ target=\_blankaffiliate program/a is not difficult to run you just need to get the basics right, and thats it your on your way to success on with your internet business.br /

br /

It doesnt matter what business your in the methods are the same.br /

br /

A word of warning if an opportunity sounds to good to be true, then it probably is!
